

ARAVINDH R

AI-Assisted Web Developer | Computer Science Graduate

B.E. Computer Science and Engineering graduate with practical exposure to AI-assisted web development, application design, and digital content creation. Experienced in using AI tools to assist with building web applications, designing interfaces, and understanding application workflows. Familiar with web technologies including HTML, JavaScript, React, and Python at a foundational level. Interested in opportunities across IT support, application development, software testing, technical operations, and graduate trainee positions. A quick learner with a willingness to develop technical and professional skills through practical experience.

ENGLISH

INTERNSHIP EXPERIENCE

Full Stack Development Intern

Samudhra Tech Solutions

February 2026 – April 2026

- Gained practical exposure to frontend and backend development workflows.
- Used AI-assisted tools to support web application development activities.
- Explored the structure and functionality of real-world web applications.
- Learned about application modules, development processes, and project workflows.
- Worked with guidance to understand web development tools and technologies.

AI & Full Stack Development Training

Jesus Redeems Ministries / TATTI Training

July 2025

- Learned foundational concepts in Artificial Intelligence and Full Stack Development.
- Gained introductory exposure to machine learning concepts.
- Explored AI-assisted development workflows and web application structures.
- Developed an understanding of basic development tools and technologies.

PROJECT EXPERIENCE

Fee Management System

Academic Project

- Worked on an academic project focused on managing student fee information.
- Explored student records, fee structures, and payment management workflows.
- Used AI-assisted development tools to support application design and implementation.
- Gained exposure to database-driven application concepts.

Billing Software

AI-Assisted Application Project

- Worked on a billing application concept for shop-based transactions.
- Explored product management, billing workflows, and invoice generation.
- Used AI-assisted tools to support application development and interface design.
- Gained practical exposure to software functionality and business application workflows.

Personal Portfolio Website

Personal Project

- Created a personal portfolio website with the assistance of AI development tools.
- Organized personal information, skills, and project details into a professional website.
- Explored responsive website design and deployment workflows.
- Published the portfolio using Vercel.

CAREER OBJECTIVE

Seeking an entry-level opportunity in Chennai where I can contribute to organizational goals, learn from experienced professionals, and develop my technical and professional skills through practical work experience.
