COMPUTER SCIENCE GRADUATE | AI-ASSISTED APPLICATION DEVELOPMENT

PROFESSIONAL SUMMARY

Computer Science graduate with internship experience in full-stack development and artificial intelligence. Practical exposure to AI-assisted development, prompt design, and workflow creation; continuing to build programming fundamentals through projects and ongoing learning.

EDUCATION

B.E. in Computer Science and Engineering | Grace College of Engineering, affiliated with Anna University | 2022-2026

INTERNSHIP EXPERIENCE

Full Stack Development & AI Intern | Jesus Redeems Ministries, Tuticorin **July 2025**
Training in full-stack development and AI; practical exposure to web development, AI applications and tools, prompt design, and workflow creation, with mentor-guided implementations.

AI Intern | Private Organization **August-October 2025**
Completed an AI internship. Additional organization and project details are kept private.

Full Stack Development Intern | Samudhra Tech Solutions **February-April 2026**
Completed a three-month internship in full-stack development.

SKILLS

Programming (Basic): HTML, React, Python, JavaScript
AI and creative tools (Practical exposure): AI-assisted application development, prompting, AI image and video generation, AI-assisted workflows
Professional: Problem-solving, communication, teamwork, adaptability, time management, continuous learning

SELECTED PROJECTS

Fee Management System With Automated Fee Assignment | Local project; implementation details and technology stack require source verification.
AI-assisted Tamil OCR | Tamil OCR and text-processing project; further implementation details are not available here.
Personal Portfolio | React, Vite, Material UI, and React Router.
